

Dr. Shawn Kaeppler, Department of Agronomy and Director of the Wisconsin Crop Innovation Center at the University of Wisconsin-Madison, USA

Dr. Shawn Kaeppler is a Professor in the Department of Agronomy and Director of the Wisconsin Crop Innovation Center at the University of Wisconsin-Madison. His research interests are maize breeding, genetics, and genomics and crop biotechnology to facilitate translational research and product development. Specific research includes abiotic stress tolerance, kernel development, epigenetics, and breeding methodology in maize. He received his B.S. degree at the University of Wisconsin-Madison, his Ph.D. degree at the University of Minnesota, and was a faculty member at the University of Nebraska from 1992 to 1995 before returning to Wisconsin. He is a fellow of the Crop Science Society of America and the American Association for the Advancement of Science.
